Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to the Appeal Brief filed on January 10, 2005, in which claims 11-20 are presented for further examination.

Response to Arguments

2. In view of the Appeal Brief filed on January 10, 2005, PROSECUTION IS HEREBY REOPENED. A new ground of rejection set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

3. Applicant's arguments with respect to the Appeal brief, filed on January 10, 2005 have been fully considered and are persuasive. The rejection of claims 11-20 has been withdrawn.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2162

5. Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al., (hereinafter "Jones") US Patent no. 6,195,422 and Campbell et al., (hereinafter "Campbell") US Patent no. 6,453,029.

As to claims 11 and 16, Jones discloses the claimed "logic for acquiring calling card system data" (col.8, lines 24-28; col.10, lines 13-25, lines 50-65; col.12, lines 7-15, lines 58-65 and col.13, lines 43-48). However, Jones does not explicitly disclose the use of transforming the system data into searchable billing data and customer usage data and providing queries on the searchable data.

On the other hand, Campbell discloses the claimed "logic for transforming the system data into searchable billing data and customer usage data" as a means for providing access to the caller's account responding to a rating query from call processor, wherein the call processor converts the account balance into a certain number of minutes for a specific connection and then subtracting the elapsed time from the initial balance (col.7, lines 28-32 and lines 46-50); and "logic for providing queries on the searchable data" by playing the remaining minutes as a warning to the caller (col.7, lines 50-53). Therefore, it would have been obvious to one having ordinary skill in the art the time the invention was made to combine the teachings of the cited references, wherein the calling card system provided therein (Jones' fig 3, "inter-LATA calling card system) would incorporate the use of transforming the system data into searchable billing data and customer usage data and providing queries on the searchable data in the same conventional manner as disclosed by Campbell. One having ordinary skill in the art would have found it motivated to use such a combination for the purpose of providing the

caller with periodic time remaining warnings when the account balance approaches a minimum amount, thereby increasing the efficiency of the calling card system.

As to claims 12 and 17, Campbell discloses the claimed "logic for loading searchable data into a billing data mart" (col.7, lines 28-32 and lines 46-53).

As to claims 13 and 18, Campbell discloses the claimed "logic for loading searching data into a usage data mart" (col.7, lines 28-32 and lines 46-53).

As to claims 14 and 19, Jones discloses the claimed "logic for creating summary tables of the billing data mart and usage data mad" (col.12, lines 8-15; col.14, lines 7-15, lines 19-34).

As to claims 15 and 20, Jones discloses the claimed "logic for refreshing the billing data mad and usage data mart" (col.14, lines 27-50).

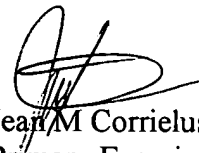

Conclusion
